Installation Guide

🖥️ **System Requirements**

- **Compatible with Windows 10 and Windows 11 operating systems.**

- **An active account on the selected trading platform is required, as the software integrates directly for algorithmic trading.**

- **No monthly subscription fee is required for API access on most platforms except Groww.**

  - **For Groww, a paid subscription is mandatory to generate an API key.**

    - **Current fee: ₹550/month**

⚙️ **Prerequisite**

- **Ensure that dotnet-sdk-9.0.103-win-x64 is installed on your system.**

  - **If not already installed, please download and install it before proceeding with the setup.**

📦 **File Extraction & Chrome Extension Setup**

For Zerodha:

- **Locate the file extension for kite.rar**

- **Extract its contents and use them to create a Chrome extension.**

- **After installation, pin the extension to your browser toolbar.**

- **You'll see a 'Z' symbol in the upper-right corner of Chrome, representing the Zerodha Cookie Extractor.**

For Groww:

- **Locate the file extension for groww.rar**

- **Extract its contents and follow the same Chrome extension setup process.**

- **After installation, pin the extension to your browser toolbar.**

- **You'll see a 'G' symbol, representing the Groww Extractor.**

For Other Platforms:

- **No extension files are required or provided.**

🔗 Integration Steps

Zerodha:

1. **Log in to your Zerodha account.**

2. **Click the 'Z' symbol once to activate integration.**

Groww:

1. **Log in to your Groww account.**

2. **Navigate to the Trade API page.**

3. **Click the 'G' symbol while on the Trade API page to enable integration.**

🚀 Launching EasyTrading.exe

- **Double-click the EasyTrading.exe file to begin installation.**

- **Follow the on-screen instructions to complete the setup process.**
